[Humax LGB-17DTTV](#)

**BEST BUY**

This 17" LCD TV is a good all rounder and has a built in iDTV tuner. The aspect ratio of 15:9 gives acceptable widescreen picture quality, and there are some nice design features, such as the comfortable carrying handle which folds away neatly at the back.

We rate this portable TV 'Best for holidays'. It can be run off a battery like those used in caravans or boats. It has a carrying handle and weighs just 7.8kg so it's easy to transport too.

The remote control is well labelled with good sized buttons, and a neat flap which covers up the lesser used buttons.

There is a child proof lock which requires a four digit Pin number, and classifies censorship according to the age limit set.

The 7-day electronic programme guide (EPG) can be customised to list favourite channels and can also show a programme synopsis. Unfortunately the EPG content is lost when you go to standby and takes a few minutes to re-populate when you power up again.

There is a CI slot to allow for the addition of TopUp TV channels.

This TV is supplied with a tiltable silver stand, but it can also be wall mounted if you buy a suitable mounting bracket.

Unfortunately, there are a couple of minor niggles. The headphone output jack is rather inconveniently positioned at the back of the set and the power usage in standby mode is quite high. So, when you're not using it for a long period of time, turn it off completely.

**Pros:** Built in iDTV. Easy to use. Good remote control.

**Cons:** Hard to reach headphone jack. Loss of EPG on standby.
